Claims "the lack of publication notice of the Claims filing Deadline was not reasonably calculated to provide notice to potential claimants who were unknown at the time of the notice." No evidence or explanation in support of this claim, amounts to a legal challenge to the sufficiency of publication notice in general rather than a challenge to the specific notices in this case. Publication notices complied with due process for the reasons stated in the accompanying decision. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Supplement filed at docket #6992, says sent paperwork many times; says attorney dropped the ball and claimant was left to resend paperwork numerous times, all of which appears to refer to correspondence with the Trust about the late-filed claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. She learned that the Maranatha Faith Center had the application and tried to get one but was told that only church members were able to apply. It was about 11 years before they heard anything, nothing in news or paper, then on April 4, 2014, a big write-up about the settlement and clean up and on April 19, 2015, the WCBI news did an interview with Pastor Steve Jamison, these are the only times she heard about the case. (Given this timing the first references to picking up claims at the Church likely were in the early 2000s and in reference to a class action.) She did not know about a future tort claim until 2015 when a friend said her aunt called to check up on her claim and wanted to know if she could add a condition to her application and they told her to file a future tort claim; "unaware of deadline or that case was still open." A supplement was filed at docket #8105, does not understand why they say her claim was late when it was mailed at same time as others whose claims were allowed; says her diagnosis was after bar date and for others who had same diagnosis date, their claims were allowed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Movant alleges awareness of Kerr-McGee potential fault. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
159	TRO888986FTC	12/30/2015	Wynn, Lynn	Lynn Wynn	3447	8185		X			X	Says that she filed a legal proceeding in approximately July of 2009 without a lawyer, mentions that she is a paralegal in a law firm; then says she filed her proof of claim late because that was when she became aware of the bar date; says she was away with a family member who was critically ill and was out of the county, does not provide dates or any supporting documents or verification of any legal proceedings allegedly filed. A supplemental response filed at docket #8185, again says filed timely claim in July 2009, but that contradicts statement that she filed late. Any contention as to a timely claim is to be addressed by the Tort Claims Trust, is not a request for relief based on excusable neglect or due process. To extent the claim was filed late, no legally sufficient excuse for late filing has been shown.

							A	B	C	D	E	
160	TRO886737FTC	12/7/2015	Davis, Jeffrey	Jeffrey Davis	3448			X				Diagnosis in 2005. Says not aware and no reason to know exposed to a Tronox product as the plant was in a neighboring town; it was not until years later when the future tort claim forms and information became known and available; called Trust and learned of the radius of exposure and that his residence was in area. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
161	TRO892317FTC	2/23/2016	Hollis, Dejuan	Dejuan Hollis	3449			X				Former resident of Columbus, MS. Diagnosis date(s) not clear. Says did not file because "no knowledge of a claim was against Kerr McGee at the time." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
162	TRO885936FTC	11/25/2015	Davenport, Pamela	Pamela Davenport	3450		X	X				1985 diagnosis. Says was told the bankruptcy case was closed and that claimants were not going to receive anything because Tronox was in bankruptcy, her spouse told her to file because they both were affected living there; he received his settlement. Alleges actual knowledge of bankruptcy and made a conscious decision not to file because of belief there would not be significant payouts, that is not grounds for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
163	TRO886467FTC	12/7/2015	Hood, Charlene	Charlene Hood	3451			X		X		Some symptoms prior but claims all diagnoses were in 2009 or after; did not file due to illness such as symptoms and being placed in and out of hospital, complications with pregnancy. No pre-bar date diagnosis identified for which relief is sought, no grounds for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
164	TRO884176FTC	11/25/2015	Conner, Geraldine	Amanda Crowell	3452			X		X		Says she did file (it appears with Garretson) but she called and they did not have them and they mailed her more forms. Dispute over an alleged prior timely filing is for resolution by the Tort Claims Trust, is not a claim for relief from the bar date based on excusable neglect or due process.

165	TRO884004FTC	11/13/2015	Fenton, Freddie	Freddie Fenton	3453	9158		X		X		Says had symptoms in prior years but no diagnosis until 2015. Says did not have condition before the time frame; there was no literature on the process of filing a claim; just did not know. A supplemental letter filed at docket #9158 complaining about the process. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
166	TRO901153FTC	8/16/2016	Gardner, Ben	Ben Gardner	3454			X		X		Diagnosis 2010; did not know there was a deadline. 167	TRO891585FTC	2/23/2016	Hopkins, Patrick	Patrick Hopkins	3455			X		X		Says diagnosis 2009-2012; did not hear anything after filed claim in 2015. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

A supplement filed at docket #8175, complaining that filed at same time as others whose claims were allowed and they were not residents of area. A supplemental letter filed at docket #8711 complaining about the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Dealings with counsel show awareness of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. 169	TRO893184FTC	2/23/2016	Robinson, John	John Robinson	3457		X	X		X		Diagnoses 1961 and 2017. Previously filed with the Colom law firm; says did not file because he is on disability and does not get around to socialize; says he was incompetent at that time and from time to time dealing with his illnesses. No supporting information provided sufficient to show inability to file a timely claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Participated in prior litigation, knew of claim and potential liability. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claim based on 1961 diagnosis also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim based on a condition first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
170	TRO886080FTC	12/7/2015	Martin, Karen	Karen Martin	3458		X	X				1974 diagnosis. Previously filed with the Colom law firm but was told paperwork was lost; she assumed she could not file again but she moved to another county and then relatives told her to try again. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Prior filing with Colom law firm shows knowledge of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
171	TRO887103FTC	12/14/2015	Moore, Curtis	Curtis Moore	3459		X	X				1976 diagnosis, possibly another in 2007. Previously filed with Colom law firm 1999 and received \$411- says he was later diagnosed with a more serious condition in 2007 but Tronox bankruptcy case did not inform him that he was eligible to refile; after hearing about people receiving settlements for lesser conditions and diseases, he inquired for the paperwork. Says Tronox was aware of the original claimants and knew to whom they had made payments but Tronox did not contact him. Prior settlement did not give Tronox reason to know the claimant allegedly had a new claim and did not require additional direct notice. On the other hand, prior claims show claimant's awareness of causal connection and liability. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.

172	TRO884558FTC	11/25/2015	Moore, Herman	Bessie Moore	3460			X		X		Diagnoses 2007 and 2013, but also says the claimant filed with the Colom law firm in a 2002 Kerr-McGee Creosote Plant Class Action. The injured party died in 2017. Allegedly did not see any publications. No indication that injured party lacked knowledge of the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Participation in class action shows knowledge of claims and legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to claims based on pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
173	TRO886452FTC	12/7/2015	Hunter, Tracey	Tracey Hunter	3461		X	X				2005 diagnosis. Says hired an attorney at an unspecified time but then cancelled the representation. Says he did not receive a notice to file and was unaware of the bar date; says that someone recently informed him and therefore the publication notice of the bar date was not reasonably calculated to provide notice to potential claimants who were unknown at the time. Publication notice was sufficient for the reasons stated in the accompanying decision. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Dealings with attorney confirm awareness of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
174	TRO887334FTC	12/14/2015	Parks, Robert	Joyce Parks Johnson	3462			X				The injured party died in 2006; rep does not provide reason why he did not file in 2009, appears to contend that he did so. No record of any claim actually filed, no basis established for excusable neglect or due process relief.
175	TRO886987FTC	12/7/2015	Moody, Victor	Victor Moody	3463	8754		X		X		Says filed a claim with Wilbur Colom and alleges a timely claim was filed. A supplemental letter filed at docket #8754 complaining about the process. If claim was filed in a class action that does not constitute a claim in the bankruptcy case. If contends that Mr. Colom should have filed a bankruptcy claim but did not do so, that does not warrant relief based on excusable neglect unless counsel's failure can be excused. If believes a timely proof of claim actually was filed in 2009, that is not a request for relief based on excusable neglect or due process, is to be resolved by Tort Claims Trust.

198	TRO895080FTC	3/23/2016	Jennings, Toney	Toney Jennings	3486						X	March 2009 diagnosis. Says was a child and incompetent and a slow learner and can't read and has to have someone else do it for her; does not say why a guardian did not file. Will permit supplemental submission explaining why parents or guardians did not file, reason why claimant did not file until 2016, and whether relief is warranted.

199	TRO895075FTC	3/23/2016	Shinn, Florence	Florence Shinn	3487			X		X		Says diagnosed in August 2009; says incompetent at time of claim filing deadline and can't read it; has to have someone do it for her. Unclear if diagnosis was before or after the August 12, 2009 bar date. August 2009 diagnosis might explain reason why August bar date was initially missed but no explanation is provided for the failure to file a claim until March 2016, more than six years after the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to claims based on pre-bar date diagnoses. Insufficient support offered as to asserted incompetence. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
200	TRO895085FTC	3/23/2016	Shinn, Cornelia Glenn	Cornelia Glenn Shinn	3488			X				July 2009 disease and diagnosis, did not know and no reason to know was exposed to a Tronox product. July 2009 diagnosis might explain reason why August bar date was initially missed but no explanation is provided for the failure to file a claim until March 2016, more than six years after the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
201	TRO884665FTC	11/25/2015	Summerville, Eddie	Eddie Summerville	3489		X	X				September 2000 diagnosis. Explanation: "thought the deadline was completed and Tronox was not taking any more applicants." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

202	TRO885974FTC	11/25/2015	James, Kathleen	Kathleen James	3490		X	X				Says that symptoms started in 1977 but was diagnosed at time started school in 1990. Then says that it was her guardian who would have to fill out form but that person was the hospital sick at the time, does not specify time. Given onset of symptoms in 1977 the claimant was no less than 41 years old at the time of the bar date, no showing as to incompetence or infancy and no showing of why claimant could not file a claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge of bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
203	TRO884958FTC	11/25/2015	Jefferson, Ytansa	Ytansa Jefferson	3491		X	X				2003 diagnosis. Says was unaware of the possibility of receiving a settlement for physical injuries. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Only alleges lack of actual knowledge of claims process, insufficient showing as to elements of excusable neglect, not support a due process claim. Claim also was time-barred under the applicable statute of limitations prior to the Tronox bankruptcy filing.
204	TRO885827FTC	11/25/2015	Williams, Pat	Pat Williams	3492			X		X		Alleges first diagnosis in 2014. Says she applied in "the round first prior to the deadline" but did not receive written notice as to the status of her paperwork and she filed again when it was advertised; is apparently referring to post-2009 filings. No claim has been asserted based on a pre-bar date diagnosis, therefore no proper motion has been made for relief from the bar date to assert such a claim. The merits of any claim based on a condition first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
205	TRO885478FTC	11/25/2015	Talley-Wilson, Lucy	Jerome Wilson	3493		X	X				The injured party died in 1978. Rep says knew nothing of this chemical waste or the lawsuit or the damage caused by the chemical or how it affected her relative. No showing as to relative's knowledge, or knowledge of other representatives, or of diligence in pursuing claim based on 1970s diagnosis. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

206	TRO897558FTC	5/25/2016	Kress, Michael	Corinne Bendowski	3494			X				The injured party died in 1995. Rep does not provide an excuse or justification for late claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. No showing of relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
207	TRO884329FTC	11/25/2015	Moody, Victoria	Victoria Moody	3495	8738	X	X		X		2000 diagnosis. Previously filed with Wilbur Colom; says a claim was filed in bankruptcy by filing deadline but there is no record of such a bankruptcy claim, claimant may be confused with claim filed in prior class action. A supplemental letter filed at docket #8738 complaining about the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Participation in prior class action shows awareness of legal rights. If claim was fully resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still-pending proceeding, it should have been filed by the bar date, because counsel (Mr. Colom) received direct notice of the bar date. If claimant believes a proof of claim actually was filed, that is not a request for relief from the bar date, and instead is an issue to be raised with the Tort Claims Trust.
208	TRO887606FTC	12/14/2015	Jefferson, Tyrone	Tyrone Jefferson	3496		X	X				First diagnosed in 2004. Says tried filing a claim when he heard but never got form; not clear if is referring to 2009 or some other time period. Says did not think he was able to file a claim until he started getting eczema and high blood pressure, but motion alleges those symptoms began in 2004, which was five years before the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
209	TRO881061FTC	12/4/2015	Jones, Sallie	Judy Jennings	3497	9366	X	X				2002 diagnosis; the injured party died in 2010. Rep does not provide an explanation for lack of timely filing. A supplemental letter filed at docket #9319 and docket #9366 complaining about the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. No proper grounds alleged for relief from the bar date. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Additional letter is at docket # 5547. Risks of creosote exposures and news of class actions were the subject of widespread news coverage in Avoca. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
211	TRO886774FTC	12/7/2015	Nicholson, Denai	Denai Nicholson	3499						X	2006-07 diagnosis. Says at the time she was a minor and unable to file a claim; does not say why guardian did not file a claim. Refers to unspecified presentations about Kerr-McGee chemicals causing injuries, alleges unfairness that cannot have compensation for Mr. Clark's injuries. No explanation as to failure to file by bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 220	TRO892008FTC	2/23/2016	Stinson, Diane	Diane Stinson	3508		X	X				Diagnosed 2001, does not properly allege excusable neglect or grounds for due process relief, just says "I was not aware." Allegations about prior timely claim are to be resolved by the Tort Claims Trust, not an excusable neglect or due process issue. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect in light of 1959-1971 diagnoses.

229	TRO905465FTC	3/28/2017	Soroka, John	Patricia Pickering	3517			X				Diagnosed 1997, filing on behalf of husband, after he died wife's mom became ill so she was preoccupied, mom passed in 2000. Moved to Delaware in 2003 and remarried. "I don't remember getting notice then [in 2003]. When I did get them it was too painful to remember and put them aside."). Reference to notices in 2003 appears to confuse the 2009 bankruptcy process with a prior class action. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
230	TRO880509FTC	12/4/2015	Ward, Paula	Paula Ward	3518	8053		X				Diagnosed 2007, contacted Powell Law firm multiple times before filing deadline but was told they weren't accepting new claims, left name but attorney neglected to call her. Alleges that "this was a complete violation of due process by Powell Law Firm." A supplement filed at docket #8053, accuses Powell firm of misconduct. Bankruptcy filing did not occur until January 2009 and bar date was August 12, 2009, so prior communications with Powell firm in 2007 could not have been about the Tronox bankruptcy process. In any event unexcused conduct by counsel is not a proper ground for excusable neglect or due process relief. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001, and contact with the Powell firm shows movant's awareness of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. If claim was late: no reason is offered, not warrant excusable neglect or due process relief. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

412	TRO891965FTC	2/23/2016	Harris, Emma	Emma Harris	3700		X	X				Docket 3700 is actually a motion for Emma Harris; it was mislabelled as a motion for Annie Dixon. The motion for the Annie Dixon claim is actually at docket 4401. Emma Harris was diagnosed in 1996. Gave \$40 to Judy Bulgin (sp?) to file a claim, had an asbestos test done and was told she was not eligible, thought that meant she should file a Tronox claim. Did not fill out other paperwork because she did not understand importance of it. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
413	TRO898671FTC	6/27/2016	Walker, Essence	Essence Walker	3701			X				Diagnosed 2009, does not say what month. "Didn't have no idea at the time." 414	TRO885951FTC	11/25/2015	Lang, Johnny	Unknown	3702	3737	X	X				Says diagnosed 2008, but alleges that he was part of a 2002 action through the Tollison law firm. Also says "I file in a timely manner, I was approved for funds. I don't understand why I am not approved now." Reference to timely filing appears to be reference to class action, which was a separate proceeding and not part of the Tronox bankruptcy. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim either was resolved in the prior action or, if not, it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
415	TRO884234FTC	11/25/2015	Shinn, Laquilla	Lawuilla Shinn	3703		X	X		X		Diagnosed in 1988, 2000, 2008, 2009, 2010 and 2011. Was told to send a copy of every location they lived in, they seemed to believe this was sufficient. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on pre-2006 diagnoses also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.

417	TRO891331FTC	2/23/2016	Burns, Muriel	Muriel Burns	3705		X	X				Diagnosed 1993, job required traveling, states that publication notice was insufficient as a result. Alleges publication notice was not reasonable but does not allege that Tronox knew of his claim and does not challenge the publication notices that were approved in 2009. Publication notices were reasonable and in compliance with due process requirements for the reasons stated in the accompanying decision. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 420	TRO896692FTC	Unknown	Anthony Stewart	Anthony Stewart	3708		X	X				Motion was not included in the Trust's summary. Diagnosed 1981. Alleges publication notice not reasonable but only in a conclusory way. No allegation that Tronox should have known of his claim and should have sent an individualized notice, no criticism of publication notices that were approved. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to claims based on pre-bar date diagnoses. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
425	TRO896577FTC	4/25/2016	Jonts, Caroline Salter	Caroline Jones	3713			X				Diagnosed 2008, did submit claim in 2015, Kerr Mckee has allegedly misplaced her claim. Appears to be under the impression that the 2015 claim was timely. No reason given for failure to file by original bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
426	TRO902826FTC	10/13/2016	Cockrell, Pearlie	Pearlie Cockrell	3714		X	X				Diagnosed 2000, did file claim but alleges was not paid fairly. Apparently filed claim in a prior legal proceeding and not the bankruptcy case. If the claim was resolved in a prior legal proceeding then it could not be reasserted in the Tronox bankruptcy case. If the claim was not resolved, then the prior proceeding shows an awareness of legal rights and the movant has failed to show sufficient diligence in pursuing the same. In addition, if the claim was not fully resolved in the prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
427	TRO88041FTC	12/4/2015	Taggart, Dottie	Taggart, Dottie	3715	8058	X	X				Diagnosed 1972, Howard Gunn filed claim for her in 2001, family has been paid but she has not. A supplement filed at docket #8058 complaining that she filed with one law firm and case was transferred to a new law firm; says Garretson firm (for Tort Claims Trust) allegedly assured her that claim was in lawsuit; Tollison firm said she was represented, but later could not find papers; went to meeting of claimants in Columbus, and was assured was in lawsuit; law firms failed to properly file and handle claim or misplaced them. Refers to filing of claim in a prior class action, which was a different proceeding and which did not constitute a claim in the bankruptcy case. Prior work with attorney shows awareness of claim and of rights. If claim was fully resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still-pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Unexcused attorney failures are not grounds for relief based on excusable neglect. In addition, claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
482	TRO895088FTC	3/23/2016	Brownlee, David	Mattie Brownlee	3771	8062	X	X				Diagnoses 1996 and earlier. Filed by relative. Says no reason to know exposed prior to death. A supplement filed at docket # 3771 and docket # 8062; simply educated, unaware of manner in which to proceed. No showing as to deceased's or his family's knowledge and diligence in pursuing claim and legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 484	TRO904998FTC	1/24/2017	Scott, Kawanis	Kawanis Scott	3773		X	X				Former resident of Columbus, MS. Says was told by an attorney in 1985 that the deadline for claims had passed and that only employees of Kerr-McGee could file. Appears to have been attempting to pursue participation in prior lawsuits by the Colom law firm. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Conduct of counsel is not grounds for relief based on excusable neglect or due process unless counsel's conduct can be excused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
485	TRO902463FTC	9/14/2016	Johnson, Charlie	Abby Durrah	3774	6644		X		X		Diagnosed "sometime 2009 or 2010." filing on behalf of brother. Filed in 2016 as well. Rejection notice filed at docket # 6644. Brother suffered, feels should be compensated. No showing as to brother's knowledge of claims process or diligence in pursuit of his rights, not qualify for relief based on excusable neglect or due process as to claims based on conditions diagnosed prior to the bar date. Merits of any claim first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.

Previously filed in 2002 with atty Howard Gunn, did not live in Mississippi to get updates, says attorney of record did not advise that he had dropped out of the suit. Additional letters were filed by Billie W. Bridges for a group of people some of which mention this name also. The additional supplements are filed at docket #8019, 8068 (with a duplicate at 8391), 8528 (with a duplicate at 8530) and #9408 and #9432, complaining about the process. They appear to confuse the bankruptcy case with the prior class actions and appear to think that the prior class action counsel was representing them in the 2009 bankruptcy case. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Class action counsel had direct notice of 2009 bar date, if was still representing the movant then should have filed a timely claim, conduct of counsel is not grounds for relief based on excusable neglect or due process unless counsel's conduct can be excused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
488	TRO881005FTC	12/4/2015	Collins, Roy	Roy Collins	3777						X	Filed in 2015, says was a child at the time of the bar date. However, he was born in 1989, so was 20 at bar date. Alleges father's and brother's claims were allowed but unclear when they filed or as to when they were first diagnosed with symptoms. Does not allege that he or his parents were unaware of the claims process or of their claims and legal rights at the time of the bar date. Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
489	TRO886956FTC	12/7/2015	Kundrat, Robert	Robert Kundrat	3778		X	X		X		Diagnoses in various years before 2009, once in 2014 (no details as to condition diagnosed then). Did not file because "we were told that since Kerr McGee was bankrupt, there would be no funds available for any claims that would be filed." Deserves credit for the honesty of the explanation but unfortunately a miscalculation of the likely recovery is not grounds for relief based on excusable neglect or due process. Merits of any claim first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
490	TRO896710FTC	4/25/2016	Ropieski, Stanley	Marian Ropieski	3779			X				Diagnosis in 2005. Says did not know "of this class action lawsuit until it was in the paper." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

491	TRO894279FTC	3/2/2016	Humphries, Pamela	Pamela Humphries	3780		X	X				Diagnosis in 1996. Says was under the impression that only people with cancer could file, then found out in 2015 that "anyone who had attended Hunt High School could filed." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 492	TRO901494FTC	8/16/2016	Wells, Lawrence	Lawrence Wells	3781			X				Former resident of Hamilton, MS. Various pre-bar date diagnoses. Alleges did not know of the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 493	TRO886961FTC	12/7/2015	Dulney, Donna	Donna Dulney	3782		X	X				2000 diagnosis. Says she was told she was not eligible (does not say by whom or in context of what proceeding). Does not allege lack of knowledge of proceeding or of bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
494	TRO898879FTC	6/27/2016	Abraham, Tonia	Tonia Abraham	3783			X				1987 diagnosis. Says was unaware of deadline. Not a sufficient showing of diligence given date of diagnosis. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect.
495	TRO884464FTC	11/25/2015	Bailey, Hattie	Hattie Bailey	3784	8260	X	X				1989 diagnosis. Did not know about claims process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
496	TRO891187FTC	2/23/2016	Tate, Annie	Annie Tate	3785			X				Diagnosis in 2006. Says "did not know about it in time." Says filed with attorney in 2002, wasn't told the attorney dropped out. There were supplemental letters filed by Billy Wayne Bridges for this party and a group of others at docket ## 7341, 8019, 8068 (with a duplicate at 8391), and 8528 (with a duplicate at 8530). The letter filed at docket #7341 by Billy Bridges on behalf of various claimants complaining as to how the attorneys representing them in the class actions handled their case and requesting that payment to the attorneys get frozen until they certify as to the way they handled the claimants' documentation. Movants appear to confuse the bankruptcy case with the prior class actions and appear to think that the prior class action counsel was representing them in the 2009 bankruptcy case. There are additional supplements filed at docket #8019, 8068 (with a duplicate at 8391), 8528 (with a duplicate at 8530) and #9408 and #9432, complaining about the process. The class actions are different proceedings that are not pending in this Court. Prior filing in class action does not constitute a filing in the bankruptcy case. Claims resolved in prior action could not be reasserted in the Tronox bankruptcy case. If the claim was not resolved and was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Complaints that attorneys with Creosote Litigation Group should have filed claims on their behalf is not grounds for relief based on excusable neglect in the absence of a showing that counsel's failures can be excused.
498	TRO904757FTC	1/24/2017	Tomassoni, Mark	Mark Tomassoni	3787			X				1998 diagnosis. Says never received direct notice that required to file a claim. Complains about lack of direct notice but does not allege that Tronox knew of the movant or of the movant's claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
499	TRO897888FTC	5/25/2016	Backowski, Albert	Albert Backowski	3788			X				November 2007 diagnosis. Says he did not see notice in the news. Found out later after other people got payments on claims. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

A supplement filed at docket #8313, without knowledge to wade through the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Motion at docket 3796 is for James A. Harris [TRO897705FTC], motion at docket 4194 is for James Harris [TRO900378FTC]. James A. 511	TRO889836FTC	2/23/2016	Craddieth, Shemika	Shemika Craddieth	3801		X	X				Diagnoses in 1987 and 1989. Claims DID file a "Future Claims" form but that apparently is a reference to a late-filed claim. No explanation of failure to file by original 2009 bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 512	TRO894866FTC	3/23/2016	Williams, Stefan	Stefan Williams	3802		X	X				Says filed in 2002 but unclear of date, claims to have filed again "when claims became available again" in October 2015. Says relatives were compensated from earlier claims. Any claim filed in 2002 must have been in connection with a prior class action. Unclear if claim was resolved in class action but if so the claim could not be reasserted in the Tronox bankruptcy case. If claim was not resolved, then participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge of bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. 517	TRO891960FTC	2/23/2016	Malone, West	West Malone	3807			X		X		The correct claim number for this motion is TRO891960FTC (listed incorrectly by the Tort Claims Trust as TRO891690FTC, which is a claim for Fannie Hackman that is governed by the motion at docket #4754.) Movant at docket 3807 says he did not file because he was not aware of any lawsuit. Diagnoses listed are after bar date, none listed before bar date. Unclear if any relief sought as to pre-bar date diagnoses, but motion denied as to pre-bar date diagnoses for failure to identify a relevant pre-bar date diagnosis and lack of proper showing of diligence and other elements of excusable neglect claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 520	TRO895842FTC	3/24/2016	Shumpert, Cedrick	Cedrick Shumpert	3810		X	X				Diagnosis in 2005. Says talked to an attorney (unnamed and at unspecified time) who said "it wasn't the deadline." Context is not clear. If he spoke to an attorney before the bar date and received bad advice from the attorney that is not grounds for relief based on excusable neglect or due process unless the attorney's conduct can be excused. If he spoke to an attorney after the bar date, that does not explain why he missed the original bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Supplements filed at docket # 8061 and # 8398. 535	TRO881086FTC	12/4/2015	Collins, Timothy	Tim Collins	3825		X	X				Mother died in 2009, claimant was the executor of her estate. Says tried to be included in early 2000s class action settlement in Columbus, MS but was told he was too late. Alleges did not actually know of the Tronox bankruptcy claims process. Says mother's death was the main focus of his life in 2009. Lives in Colorado. States that he knows publication notice is technically considered to be adequate, but local MS notices provided discernable advantages to people who were living in that state. However, reference to the prior class action shows knowledge of legal claims and rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim that had accrued as of the early 2000s also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

546	TRO893149FTC	2/23/2016	Coleman, Jacqueline	Jacqueline Coleman	3836	4823	x	X				1985 diagnosis but recurrence of tumors after bar date. Was unaware of exposure prior to deadline. She and her physicians did not know of connection to creosote. Says did not have access to any of the publications with notice, but notice was published in the Commercial Dispatch in Columbus. Also says notice only allowed 52 calendar days or 36 business days to file a claim and that was unreasonably short, but that does not explain why she filed no claim until more than six years after the bar date. Says did not know and no reason to know exposed to a Tronox product; she says that "unlike the case heard by the court in Standard Bank who heard about the contamination in October 2012 and did not file until September 2014" she says that when she learned of it in 2015, she filed immediately. A supplemental form was filed at docket # 4823. Suggests she consulted with physicians about causal connection and was unaware of creosote link. 879	TRO897870FTC	4/9/2016	Facciponti, Adam	Adam Facciponti	4205			X			X	2006 diagnosis. Says was a minor when case began but alleges exposure began in 1985 so was at least 24 years old at the time of the bar date. Also says was in U.S. Air Force and did not hear about this matter until 2014. Claim was not filed until April 9, 2016; even if the bar date was tolled by 50 U.S.C. 3936, the claim would be untimely so long as military service ended on or before January 23, 2016. The motion alleges lack of actual knowledge in 2009 but makes no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date and why waited so long after learning of the process in 2014), would not be sufficient to warrant an untimely claim to be permitted on grounds of excusable neglect. If movant believes that military service continued until January 23, 2016 or later, movant may make a supplemental submission to verify the dates of military service.

The excuse for Willie Harrison [TRO894573FTC] is that he was unaware of the bankruptcy case; 2002 letter says brain injury precludes claimant from making decisions for himself, and spouse should make decisions but she did not file claim. No explanation of why spouse did not file a claim. Alleges lack of actual knowledge of the bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims that had accrued as of 2003 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1168	TRO896419FTC	4/13/2016	Stewart, Dominique L.	Katrice Stewart Ward	4504		X	X				There are actually two separate motions for this TRO claim number; the first is for Katrice Stewart, which is on the docket at claim #4503, and the second is for Dominique Stewart at docket # 4504. The motion at docket 4504 alleges diagnoses in 1987 and 2006. Movant also contends she previously filed with the Colom law firm in 2003. Says did not receive notice of bar date. Claims was a child, but also says exposure began in 1987 and diagnoses were in 1987, so movant had to be approximately 22 years old at the time of the bar date in 2009. Participation in prior proceeding shows awareness of claim and of legal rights. Proof of service shows direct mailing of bar date notice to the Colom law firm, so if movant was represented by that firm in 2009 direct notice was provided. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge of the bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

1170	TRO891910FTC	2/23/2016	Scott, Veleria	Veleria Scott	4506	6640	X	X		X		Duplicate motion at docket # 6640. Various conditions listed; first diagnosis date listed as 1975 but some conditions are described as having later onsets; says was not aware, no idea she was being exposed until she was told during a meeting because she is a homeowner in this area; due to the affected area, she cannot sell her home, the value is worth nothing of what she paid for it. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Unclear if claiming new conditions were diagnosed for the first time after the bar date, but if so the merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Participation in prior proceeding shows awareness of claim and of legal rights. If counsel lost or misplaced a claim in another proceeding, that is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

1373	TRO902301FTC	9/14/2016	Williams, Arvin	Mattie Williams	4713		X	X				1978 diagnosis. Former resident of Columbus, MS. Premature infant deceased, rep says residing in Arkansas since 2000; unaware of class action until late, then unaware of bar date, then when another lawsuit was opened (presumably she means the filing of claims with the Trust in 2015 or so) she received an application from Garretson but they did not mention that the deadline had passed. Claim based on a 1978 diagnosis is not a future tort claim. Claim was time-barred by the time of the Tronox bankruptcy filing. Even if claim were not time-barred, the motion alleges lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
1374	TRO880717FTC	12/4/2015	Williams, Augusta	Mattie Williams	4714		X	X				1985 diagnosis; injured party died in 2006, filed by same representative as claim 4713 (a former MS resident), refers to an attached letter. Claim was time-barred by the time of the Tronox bankruptcy filing. Claim based on a 1985 diagnosis is not a future tort claim. Even if the claim were not time-barred, the movant alleges lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

1412	TRO891206FTC	Unknown	Mosely, Freddie	Freddie Mosely	4755		X	X				The Trust's summary correctly listed the motion at docket 4755 as a motion by Freddie Mosely but the correct claim number is TRO891206FTC. Prior dealings with attorney show awareness of claim and legal rights. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1677	TRO897409FTC	5/25/2016	Mills, Linda	Linda Mills	5027			X		X		Diagnoses in 1989, 1992 and 1995, "chest pains" in 2010. Unaware of bankruptcy proceedings; did not hear about it. Unclear if chest pains in 2010 represented a new condition, but the merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

1751	TRO887186FTC	12/14/2015	Hogan, Shelly	Shelly Hogan	5103		X	X				The motion at docket # 5103 is for Shelly Hogan (TRO887186FTC) on her own behalf. Shelly Hogan also filed separate motions as to Mitchell Marlowe (TRO896066FTC) at docket # 5392 and for Mitchell Marlowe (TRO888805FTC) at docket # 5457. As to the motion at docket # 5103: Ms. Hogan says she was diagnosed in 1972 and previously filed with Colom law firm and received \$1,200; says publication notice was not reasonably calculated to provide notice; did not know and no reason to know exposed to Tronox product; asserts that the discharge of her claim is a violation of due process. Participated in a prior legal proceeding and already received compensation. Claim that was resolved in a prior proceeding could no longer be asserted in the Tronox bankruptcy. Publication notices complied with due process for the reasons stated in the accompanying Decision. In addition, the motion alleges a lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), is not sufficient for relief based on excusable neglect. Claims based on conditions first diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. If filed with Colom firm in a prior action that shows awareness of legal rights. To the extent the claim was resolved in that action it cannot be reasserted. If not resolved, and if Colom firm did not file the claim in the Tronox bankruptcy case, the allegation that the Colom firm was unaware of the bar date is rejected. The Colom firm was actively involved in the Tronox bankruptcy case and received direct notice of the bar date. If counsel failed to file claim that is not grounds for relief based on excusable neglect or due process. Claim based on 2001 diagnosis also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

A supplement with medical records filed at docket #8128. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a different litigation it cannot be asserted in the bankruptcy case. If claim was not resolved, attorneys should have filed it in the bankruptcy proceedings. Colom firm was active in the bankruptcy proceedings and had direct notice of the bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2083	TRO895517FTC	3/24/2016	Williams, Robert	Tony Hampton	5454		X	X				1999 diagnosis; the injured party died in 2011; rep says that the claimant's health continued to decline while the rep was incarcerated and injured party was too sick to file his own claim; rep says not given justifiable allowance under the guidance of Colom and Lundy; violation of due process; private meetings, minimal details to community. Insufficient showing of incapacity in sense of inability to file claim or to enlist others' help in doing so. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

As to Hattie Tate: diagnoses dates in 1986 and 1994; claimant says was unaware of the deadline, publication notice was not reasonably calculated to provide notice; lives in rural area on a fixed income and can't afford newspapers or computer, information was not publicized on TV. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Complains that notice was deficient but does not say how, notice language was proper for reasons stated in the accompanying Decision. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 2096	TRO889805FTC	2/23/2016	Cunningham, Johnnie	Johnnie Cunningham	5467			X				Says he did file a claim (date unspecified) but was turned down; likely is referring to the late-filed claim, under misimpression that it was timely. If filed a timely claim before the bar date on August 2009, any dispute over its resolution should be done through the Tort Claims Trust dispute resolution procedures. If did not file a timely claim, no reason has been offered as to why relief from the bar date should be granted.

2099	TRO887191FTC	12/14/2015	Richardson, Selvin	Selvin Richardson	5470	6142?	X	X				<p>This motion may be a duplicate of the motion at docket #6142. It is not, however clear if that is the case because of certain discrepancies. The motion at docket # 5470 is for Selvin Richardson [claim TRO887191FTC] and the motion at docket #6142 is for Selvin I. Richardson [claim TRO894564FTC]. It may be the same person using a different TRO number because the addresses are the same and the signatures are very similar. However, while some of the symptoms overlap, they are not identical. The motion at docket #5470 says 1979 is the date for exposure, symptoms and diagnosis, while the motion at docket #6142 says 1988 is the date for exposure symptoms and diagnosis. The motions both provide the same excuse, did not know and no reason to know exposed to a Tronox product, discharge of debt violation of due process; publication notice not reasonably calculated to provide notice. Court will treat them as two separate motions and two separate claims out of abundance of caution. As to the motion at docket 5470, relief is denied. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Says discharge of debt violation of due process; publication notice not reasonably calculated to provide notice. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not fully resolved in prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

2141	TRO905733FTC	3/28/2017	Anthony, Lerond	Tremata Anthony	5512		X	X				1953 diagnosis; injured party died in 1994; rep says that rep was away with the Armed forces and did not return to Columbus, Miss after her tour (does not specify dates of service, how they relate to bar date, or why waited so many years after the bar date before filed a claim). Rep resides in Georgia and was unaware and did not know injured party exposed to Tronox product. Rep attaches the same form letter that refers to not being given justifiable allowance under the guidance of Colom and Lundy and refers to private meetings and minimal information to community. A supplemental letter filed at docket #5543 filed by Pamela Richey for herself and additional claimants. The letter is the same letter filed by many claimants that says a person claiming to represent trust instructed what to fill out and form to use and allegedly misled them in 2015 or later. Continuation of a pre-bar date diagnosis does not itself mean that a claim is a Future Tort Claim; there must be a condition that has not been diagnosed before the bar date. Military service tolled application of state statute of limitations (if not already expired as of January 2003) and tolled application of the bar date, so the claim cannot be excluded on timeliness grounds. The claim is permitted subject to such defenses as the Trust may assert, which are to be resolved under the Trust's normal dispute resolution procedures.
2340	TRO901613FTC	8/16/2016	Brown, Catina	Catina Brown	5713		X	X				Exposure began 1974, diagnosis in "middle school"; did not know about the legal proceedings or the class action lawsuit against Tronox. Participation in prior proceeding shows awareness of claim and of legal rights. Any confusion as to a prior class action needs to be addressed in that proceeding. Powell firm participated in the bankruptcy case, if did not file a claim for this movant that is not grounds for relief unless counsel's failure can be excused, no such excuse is offered. 2343	TRO903257FTC	10/27/2016	Farrell, Michael	Michael Farrell	5716	8187		X		X		Says first diagnosis in 1996 but lists various different conditions, does not appear to have listed the first diagnosis date for each condition, some conditions listed as starting before bar date, some after. Rep says the injured party worked at the plant and that he was threatened by management not to file any lawsuit against the company or he would not be able to collect pension. Motion acknowledges that the plant was closed in 1996, 13 years before the Tronox bankruptcy filing in 2009, but movant alleges that the injured party was afraid that his pension would be affected if made a claim. Does not allege lack of notice of bar date or of his legal rights. No identification of who allegedly said not to file a lawsuit, or when. Rep says the injured party suffers from functional illiteracy, incompetence in reading, writing and mathematics, and rep says she was the only person to assist but at the time was deployed in Iraq, but not a sufficient showing of injured party's inability to file or to enlist help of others in doing so. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Insufficient showing of relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date) for relief as to pre-bar date diagnoses. 2475	TRO884659FTC	11/25/2015	Mullins, James	James Mullins	5852			X				2008 diagnosis; previously filed with atty Bambach, was informed that paperwork was given to another attorney and they would contact him but they did not. When he tried to find out by asking he was told it was too late. Prior dealings with attorney show awareness of claim and legal rights. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2476	TRO884916FTC	11/25/2015	Williams, Iesha	Iesha Williams	5853			X		X		Diagnoses in 2010; unaware of the process and did not know could file a claim; violation of due process. No pre-bar date diagnosis identified for which relief is sought, no basis for relief based on excusable neglect or due process. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
2477	TRO889761FTC	2/23/2016	Phillips, Marcus	Beverly Phillips	5854			X		X		Says symptoms and diagnosis were in 2010; cut-and-pasted form language as to reasons why missed bar date. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
2478	TRO899956FTC	7/25/2016	Henley, Janie	Willie Henley	5855		X	X				1970 diagnosis; the injured party died in 2000; cut-and-pasted form language as to reasons why missed bar date; says claim should be a Future Tort Claim because mother had many illnesses, but mother died in 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2479	TRO902935FTC	10/13/2016	Henley, Richard	Willie Henley	5856		X	X				1981 diagnosis; the injured party died in 1991; standard cut-and-pasted form language as to reasons missed bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2480	TRO903399FTC	10/27/2016	Trimble, Lucian	Lartha Lenoir	5857		X	X				2002 diagnosis; the injured party died in 2004; previously filed with atty Navarro, Kerr-McGee Plant Class Action; standard cut-and-pasted form language as to why missed bar date. Participation in prior proceeding shows awareness of claim and of legal rights. Claim either was resolved in that action or, if not, it was time-barred before the Tronox bankruptcy filing.

2481	TRO896617FTC	4/25/2016	Brooks, Mildred	Mildred Brooks	5858			X		X		Alleges conditions that arose before and after bar date. Says the published bar date notice did not allow a reasonable amount of time to file claims, but that does not explain the many years of delay before claimant filed a claim. Also says was unaware exposed to a dangerous Tronox product. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

A supplemental letter filed at docket #9125 complaining about the process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2483	TRO894330FTC	3/2/2016	Griffin, Chiquita	Chiquita Griffin	5860			X		X		Did not know about the claim until a neighbor told her; says all symptoms and diagnosis after bar date. No pre-bar date diagnosis identified for which relief is sought, no basis for relief based on excusable neglect or due process. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
2484	TRO900355FTC	7/25/2016	Trimble, Charles	Charles Trimble	5861		X	X		X		Alleges a 2014 diagnosis but also says previously filed with atty Navarro, Kerr-McGee Plant Action; standard cut-and-pasted language as to reasons why missed bar date. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. 2485	TRO889367FTC	2/23/2016	Potorski, Robert	Robert Potorski	5862			X				1996, 2002 and 2004 diagnoses; unaware this was going on because he was not living in Avoca at that time and was never notified. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2486	TRO889860FTC	2/23/2016	Calloway, Kira	Kira Calloway	5863		X	X				1998 diagnosis; says that she was told by Tronox office to wait until further notice to send in documents of verification of illness but that apparently is a reference to her communications with the Trust long after the bar date, no indication of any initial filing before the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. However, that apparently is a reference to communications with the Trust about the late-filed claim as there is no indication of any claim filing before the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2498	TRO897447FTC	5/25/2016	George, Michael	Joyce George	5875			X				1980s diagnosis; the injured party died in 1992; rep says that she did file paperwork prior to bar date and in the beginning was told the Powell law group would be handling the claims. When she heard that the Powell law group would not be handling it any longer, she called the 800 number (Garretson), but that must have been long after the bar date because the trust was not established until after the plan was confirmed. After inquiring several times was later told they did not have any paperwork and she should file again. To the extent that the movant alleges a failure by the Powell law group, as counsel, that is not grounds for relief based on excusable neglect unless the failure by the Powell law group can be excused, and no excuse has been offered. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2499	TRO898886FTC	6/27/2016	Hughes, Malone	Malone Hughes	5876			X				Symptoms began in 1962, no diagnosis; no excuse provided as to why missed bar date. (May be referring to late-filed claim with Garretson group as there is no record of a timely claim.) Claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing so the claim must be disallowed regardless of whether a timely proof of claim was filed.
2501	TRO898887FTC	6/27/2016	Morgan, Genia	Genia Morgan	5878		X	X				1960-61 diagnosis; previously filed with Colom law firm 2001; she says that she went to doctors provided by attorney Wilbur Colom in 2001; she says the claim was mailed, however, "they" claim they did not receive it. She mailed it over and over and they still said they did not receive it. Then she began to get proofs of mailing. No record of any claim in 2009, references to mailings may be references to late-claim filings with the trust. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2530	TRO887969FTC	12/18/2015	Hughes, Bertine	Bernard Hughes	5908			X				Diagnoses 1985 to 1997; rep says nothing received regarding lawsuit, says claimant suffered from memory loss and dementia, incapacity from strokes and heart attacks, could not handle business affairs, but rep does not provide dates; unclear if claimant is deceased as rep says symptoms and diagnosis from 1985 to 1997 but in response to her residence from 2009-2011, says Tennessee, does not include any medical records. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2531	TRO903629FTC	11/23/2016	Lancaster, Cathy	Cathy Lancaster	5909		X	X		X		Previously filed with Colom law firm 1999; offered a settlement of \$562,000 but says it was for cancer and loss of child, says is still owed over \$100,000. She says that attorneys took \$17 million and 60% of every claim. She says "[w]e only agreed to 33% but toward the end they sent us a letter stating that we would not get the balance of any money that we were owed, and no reason why"; as for current action, she says was not contacted about bar date; the lawyers got all the money and the claimants were cheated. Prior class action is not under this Court's jurisdiction. Participation in that action shows awareness of claims and legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. 2535	TRO891251FTC	2/23/2016	Green, Alashia	Alashia Green	5913		X	X		X		Various diagnosis dates, some before and some after the bar date; previously filed with Colom law firm; says around 2002 she found her name on some form, she did not meet with the attorney, it was just presented to her whether she accepted it or not. The attorney just sent a letter where to meet after the settlement but no other information was provided. Those allegations all relate to the prior class action and not to the bankruptcy process. Also says the publication notice was not reasonably calculated to provide notice; violation of due process. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Jones [TRO895805FTC], signed on her own behalf; a separate motion for a Lula Jones [claim TRO890012FTC] was filed by Andre Jones and is at docket #6274. The excuse for Lula B. Jones [TRO895805FTC] is that claimant did not know about bar date but also says symptoms and diagnosis came after the bar date; does not include medical records. No pre-bar date diagnosis identified for which relief is sought, no basis for relief based on excusable neglect or due process. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

She says that at that during that time she was very sick and unable to walk or stand for a long period of time. She's been unable to walk since 2005. She includes a facts and conclusions statement related to a social security claim. Movant has identified physical limitations but not an inability to file a claim or to enlist the help of others in doing so. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2544	TRO887786FTC	12/14/2015	Lidell, Annie	Morris & Emogene Liddell	5922	8382	X	X				1996 diagnosis; the injured party died in 2002; did not know about such a claim. A supplement filed at docket #8382, says as excuse for lateness they were in midst of a family crisis, but it is unclear to which lateness it refers, the date is not provided and it may more likely refer to the lateness of the filing with the trust as this excuse was not provided in the initial filing. In any event, family crisis does not explain many years' delay after the bar date before a claim was filed. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. A supplement filed at docket #6041, says publication notice of the claims filing deadline not reasonably calculated to provide notice; did not know and had no reason to know exposed to a Tronox product. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Then he learned that Tronox still "had the case open" and so he filed in 2015 and 2016. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process. If military service ended before 2006 then the claim would have been time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Military service would not have tolled the application of the bar date in 2009 unless the movant continued to be in military service at that time. Will permit supplemental submission to verify dates of military service if movant believes that the application of the bar date was tolled due to military service or that the dates of military service justify relief based on excusable neglect. Otherwise, the motion will be denied, as there is an insufficient showing as to factors relevant to excusable neglect relief and as it appears, unless contrary information is provided, that the claim was time-barred under the applicable statute of limitations.

2637	TRO901999FTC	9/14/2016	Williams, Shemeka	Shemeka Williams	6025			X		X		Says she was unaware that these chemicals were affecting her that much; attaches same letter concerning purported Garretson rep directing them to file certain pre-filled forms, but that had to be long after the bar date because the trust was not established until long after the bar date; says diagnosis was in 2010. No pre-bar date diagnosis identified for which relief is sought, no basis for relief based on excusable neglect or due process. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2642	TRO903554FTC	11/23/2016	McCoy, Tequila	Tequila McCoy	6030			X				2007 diagnosis; did not file before the deadline because she was incapacitated, was diagnosed with sarcoidosis and was dealing with her illness (says diagnosed in 2007); also says was traveling back and forth to Tenn. for a relative's treatments. Allegations of incapacity explain why filing did not occur in 2009 but do not explain the length of time that passed before a claim was filed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. To the extent the claimant alleges claims based on conditions that were first diagnosed after the bar date, the claim is to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
2690	TRO889588FTC	2/23/2016	Brown, Sammy	Sammy Brown	6080			X				2006 diagnosis (colon cancer); says that at the time of the filing deadline, he had just begun to live life in its new normality due to procedures, doctor appointments and stresses after surgery. Also says he was led to believe through local papers, TV and community leaders that the filing was a private entity for the Maranatha church; that apparently is a reference to the fact that the Church filed a pre-bankruptcy lawsuit. Did not file claim until 2016, does not explain that long delay. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 2701	TRO889564FTC	2/23/2016	Jackson, Travante	Travante Jackson	6093		X	X		X		Says he filed a claim in the Tronox bankruptcy case by the claims filing deadline, but the only record of a claim is one filed on 2/23/16, which was long after the bar date. Says he got "locked up" on several occasions after filing the claim, got out of jail in August 2017, but that does not explain failure to file by bar date. Also filed form letter saying "was not given justifiable allowance under the guidance of Colom and Lundy"; discharge of claim violation of due process; refers to secret meetings in the community and minimal details to the community at large. The form initially had a date of diagnosis prior to bar date but then movant wrote over it to make it a date near bar date. Various conditions are alleged, not clear if alleges anything first diagnosed after bar date. Douglas Dalrymple firm 2003; says that she filed a claim by the deadline [apparently under the mistaken belief that the 2016 claim was timely], however the claim was filled out incorrectly. The claim was filled out using illness starting in 1975 rather than 2009. The reason being that she filed a claim with Colom in 2001. There was a settlement in 2002 and she was offered \$8,500. Movant rejected the offer. In 2003, filed a claim with the Dalrymple law firm. A year later the atty decided to drop the proceedings. Now movant wants consideration as a future tort claimant. Continuation of a prior condition is not a future tort claim. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2750	TRO894564FTC	Unknown	Richardson, Selvin	Selvin Richardson	6142	5470?	X	X				The motion at docket #6142 is for Selvin I. Richardson [TRO894564FTC]; there is another motion filed for Selvin Richardson [TRO887191FTC] at docket #5470. It is not clear whether or not it is the same person, the signatures are very similar and the addresses are the same, but while some of the symptoms overlap they are not identical. In addition, Selvin I. Richardson [TRO894564FTC] says 1988 is date for exposure, symptoms and diagnosis, while Selvin Richardson [TRO887191FTC] at docket #5470 says 1979 is date for exposure, symptoms and diagnosis. They both provide the same excuse, i.e.: did not know and no reason to know exposed to a Tronox product, discharge of debt is a violation of due process, publication notice not reasonably calculated to provide notice. Court will treat them as two separate motions and two separate claims out of abundance of caution. As to the motion at docket 6142, relief is denied. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 2791	TRO889765FTC	2/23/2016	Keye, Terrance	Tietti Chandler	6185							Injured party was a minor awaiting adoption at time of the bar date; parent was living in a group home; rep files the letter that says "was not given justifiable allowance under the guidance of Colom and Lundy"; violation of due process; refers to private meetings in community and minimal details imparted to rest of community. Rep also says that symptoms and diagnosis were after the bar date. Claim allowed on grounds of excusable neglect, merits to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.
2792	TRO897673FTC	5/25/2016	Dismuke, Jacob	Carla Harris	6186			X				1992 diagnosis; the injured party died prior to the bar date; says publication notice of the claims filing deadline was not reasonably calculated to provide notice; did not know and had not reason to know of exposure to a Tronox product. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. 2797	TRO888398FTC	12/18/2015	Harrison, Gregory B.	Gregory Harrison	6191		X	X				1998 diagnosis; former resident of Columbus, MS; previously filed with the Colom law firm in 2002; did not know about the bankruptcy process, would have filed if he had been told about it. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. If the claim was not resolved and was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In addition, movant alleges lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2798	TRO904149FTC	1/3/2017	Hanson, Kay	James Hanson	6192		X	X				1991 diagnosis; rep says that the injured party did not file because of her health condition in 2009 but does not explain many years' delay after 2009 before filed the claim. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2799	TRO884893FTC	11/25/2015	Bradley, Shonda	Shonda Bradley	6193			X				Diagnosis date not listed; says was a minor but lists birth date as June 24, 1988, so was 21 years old as of the bar date and was not a minor; says mother filed a claim because she was a minor but may be thinking of a claim in a prior lawsuit as there is no record of a timely filed claim in the bankruptcy case. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2800	TRO903064FTC	10/13/2016	Williams, Rosie M.	Rosie M. Williams	6194		X	X				The motion at docket #6194 is by Rosie M. Says she never received a letter concerning a filing deadline and she is and was incapacitated. Alleged diagnosis date is 2003. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges physical limitations but does not show inability to file a claim or to enlist the help of others in doing so. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. A supplement filed at docket #8164 adding an additional post-bar date condition (high cholesterol). Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Bar date notice was published in three different MS newspapers in June 2009 including the Commercial Dispatch in Columbus (which was only 26 miles from Starkville), the Clarion-Ledger in Jackson, and the Hattiesburg-American in Hattiesburg), as well as in newspapers in nearby states and the national edition of the Wall Street Journal. 2811	TRO889141FTC	2/23/2016	Cole, Latashia	Latashia Cole	6206		X	X		X		Former resident of Columbus, MS who moved in 2007; diagnoses 2003, 2015 and 2016; only became aware of the lawsuit against Tronox in 2015, in 2009 was unaware of the filing deadline or her filing eligibility. Says that to bar her future tort claim violates her due process rights because she did not receive notice of the lawsuit and the 2009 deadline; says that public notice provided was not sufficient for her case because she did not live in the local newspaper area at the time notice was made. She says that some conditions were diagnosed prior to the bar date and some after. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
2813	TRO893819FTC	3/2/2016	Johnson, Linda	Linda Johnson	6208			X		X		Alleges a 2017 diagnosis; says was not aware of the bankruptcy process; says the form of notice was deficient on its face but does not say how and does not allege that movant read the notice; says publication notice of the claims filing deadline was not reasonably calculated to provide notice; did not know and had no reason to know exposed to a Tronox product; these excuses were checked off in the sample list of issues provided by the Trust. She also checked off that neither she nor her atty received direct written notice of bar date after commencing a legal proceeding against Tronox, but in answer to other questions the application says there was no such prior proceeding. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2819	TRO897365FTC	5/25/2016	Carr, Erica	Erica Carr	6214			X		X		Lists a January 2009 diagnosis but mentions a number of conditions, unclear if some might have been first diagnosed after the bar date; former resident of Columbus, MS; says from 2008 -2009 began to get very sick causing her to be in and out of the hospital; she had nowhere to stay but with different family members every day, became pregnant with third child and stress overtook her, she gave birth early because of health issues. She does not state the year but based on the earlier narrative, it appears it may have been 2009, near the bar date in August. Claimant explains why missed the bar date itself but not the subsequent delays (nearly 7 years) before filing a proof of claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2820	TRO884063FTC	11/13/2015	Moore, Jaimee	Jaimee Moore	6215			X				February 2006 diagnoses; did not know exposed to a dangerous chemical; does not have access to any of the newspapers where the notice was posted and does not even know of most of them; in any event, the publication only allowed 52 calendar days or 36 business days to file, not a reasonable amount of time to gather the necessary information, including medical records, to adequately support and document a claim for contamination. Complaints about short amount of time before the bar date do not explain or justify the claimant's seven-year delay before making a claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2826	TRO886655FTC	12/7/2015	Fairley, Doris	Anthony Bailey	6222		X	X				1985 diagnosis; the injured party died in 2017; rep says that she lives in Tennessee and besides work, she went back and forth to care for the injured party in Mississippi who was in and out of hospitals but she does not provide the dates or documentation for this care-giving. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2827	TRO891684FTC	2/23/2016	Tremble, Tynesha	Tynesha Tremble	6223		X	X				Diagnosis dates listed as "1985, 1990s, 2000s"; former resident of Columbus, MS who previously filed with the Colom law firm in 2002; says should not have to prove entitlement to compensation given her injuries, gave the information to the Colom firm in 2002. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. If the claim was not resolved and was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

A rejection notice for this claim is filed at docket #6225. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. 2832	TRO895207FTC	3/23/2016	Smith, Alfonza	Alfonza Smith	6229	8120		X			X	Appears that he filed an original application with earlier dates for a diagnosis and now is saying that was all a mistake that he was only referring to symptoms decades before the bar date but his "official" diagnosis was not until after the bar date. However, claimant also mentions trying to file a claim in 2002. A supplement filed at docket #8120, says diagnosis for palpitations after bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

The same motion was filed with a different TRO claim number at docket #6507 [TRO896699FTC]. It appears that the original claim may have mentioned earlier conditions and/or diagnoses, but motion only references alleged condition first diagnosed after the bar dates. Motion does not identify any pre-bar date diagnoses for which relief from the bar date is sought, and so motion for permission to file such claims is denied. The merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Also says was a minor, but alleges exposure began in 1986, so was at least 23 years old at the time of the bar date. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to other pre-bar date diagnoses. Any form prepared in 2002 must have been in connection with a prior class action, particularly if it asked if person lived in covered area. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. A duplicate motion is filed at docket #6468 with a different TRO number [TRO900762FTC] and with the claimant's name listed as "Tony Brakett" but the same address and signature. A supplemental letter filed at docket #8907 complaining about the process. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. 3066	TRO890212FTC	2/23/2016	Pollard, Bryant	Pamela Pollard	6471			X				2006 diagnosis; rep of minor says was told that because of where they lived, they did not qualify to apply for the future tort claim but that after some years passed by, "the area to apply was extended." Advice about restraints based on where claimant lived is likely based on prior class action (which was on behalf of residents in a certain area), not the bankruptcy case. Says the publication notice was not reasonably calculated to provide notice to potential claimants who were unknown at the time of the notice. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. He says a relative's claim who was in military out of state was approved for processing based on non-notification (out of jurisdiction). Says his own claim not going forward would be a violation of due process. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. A supplemental letter filed at docket #8209, at time she filled out the claim, she had no knowledge there was a deadline; unaware of the claim until a neighbor informed her she could file based on where she lived. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

3137	TRO894633FTC	3/23/2016	Anthony, Leatha	Leatha Anthony	6542	9106	X	X		X		Diagnoses in 1988, alleges new condition diagnosed in 2015; previously filed with Colom law firm and received \$256.00; says not aware could file because she received an award from filing with Colom. A supplemental letter filed at docket #9106 complaining about the process. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. If claims based on pre-2006 diagnoses were not resolved in a prior proceeding then they were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of claim based on alleged post-bar date diagnosis (including the merits of any defense as to whether the claim is barred by a prior class action settlement) are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3138	TRO895200FTC	Unknown	Young, Ke'ayr	Ke'ayr Young	6543						X	Not included in Trust's summary. Diagnosed at birth (1994); minor, did not know could file a claim. Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
3139	TRO895915FTC	4/6/2016	McKnight, Kayla	Kayla McKnight	6544						X	2000/01 diagnoses; did not have any knowledge of Tronox or its bankruptcy case; did not receive any notice by telephone, email, letter or other media; part of time was away at college. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. However, although the claimant did not seek relief based on infancy it appears possible the claimant was a minor at the time of the bar date. Will permit supplemental submission to verify age as of the bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

3140	TRO896641FTC	4/25/2016	Bigbee, Doris	Doris Bigbee	6545		X	X		X		Diagnoses in 1970, 1999, 2011, 2016; says did file a claim by deadline but appears to be under mistaken impression that late-filed claim was timely. No reasons listed for failure to file by bar date in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. 3141	TRO899026FTC	6/27/2016	Williams, Geraldine	Geraldine Fields Williams	6546		X	X		X		Various diagnosis dates, most before the bar date but some after; unaware of the bankruptcy case and the claims filing deadline; lacks knowledge how to complete a claim and "not knowing all chemicals"; heard about it in 2016; was given a contact to a lady portraying to represent Garretson Trust and says she requested to be compensated to assist in filling out the claim. The claimant says that because she did not know the chemicals to which she was exposed and had no clue which form to fill out or how to fill it, the form was provided to her and she was instructed what to fill out. The purported Garretson lady informed her to document a chemical that was not involved in this settlement. The claimant wants to now be allowed to file a claim with these other chemicals as the cause of their condition. She sent the same letter many others sent about this pre-filled form directing them to file for category A chemicals rather than category d and now they want to refile claims. References to Category A and to Category D may be to creditor classifications under the confirmed plan; Category D, however, was available only for persons who filed claims before the bar date, and the only assets still available for claims are those set aside for Category A. Complaints about difficulty filling out trust claim forms should be resolved with the trust but are not relevant to a motion pertaining to the 2009 bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Bankruptcy process did not start until 2009, however. Prior dealings with attorney show awareness of claim and legal rights. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. 3264	TRO886621FTC	12/7/2015	Williams, Sydney	Williams, Sydney	6672			X		X		Claims diagnoses in 2010 (sinusitis) and 2017 (hypertension), says sinusitis claim was rejected because the date of diagnosis was wrong; says did not know could add additional information about claim. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3265	TRO880964FTC	12/4/2015	Gardner, Charles	Charles Gardner	6673			X		X		Says did not know dates to file. Diagnosed "on or before 2009-2017." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

3268	TRO893756FTC	3/2/2016	Pippins, Frank	Frank Pippins	6676		X	X				1963 diagnosis; part of 2000 action with Colom law firm; says publication notice was not reasonably calculated to reach claimants; says was in the army, but that was in 1970s. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

From 2005-2010 was stationed in various places, including abroad. Military service ended in July 2010. Even if application of the bar date was tolled by 50 U.S.C. 3936 that would still have required a claim no later than late September or early October 2010, actual claim was not filed until much late. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

3332	TRO895828FTC	3/24/2016	Smith, Henry	Eva Smith	6744	8071	X	X				The injured party died in 1989; widow was unaware of deadline. Says publication notice was not reasonably calculated to reach claimants. A supplement filed at docket #8071, objects to the statute of limitations defense because the presence of the dangerous chemicals were not discovered until after 1989; says the fact that only 5% of claimants filed prior to bar date establishes that notice was deficient. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Under MS law the statute of limitations begins to run on the date of diagnosis regardless of whether the injured party knows the cause of injury. A supplement filed at docket #8146 complaining that the trust grouped her with others filing identical excuses and says that the excuse is exactly what happened to her and "the reasons should be used by anyone as long as it is the truth." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3468	TRO899295FTC	7/11/2016	Hairston, Clara	Clara Hairston	6885	8372	X	X				1958 diagnosis; says previously filed a claim in 2002 with her two sisters with attorneys in West Point, MS; one sister received a payment. Clara and the other sister were allotted \$500 each and were told by the agent not to accept it because if they did they "would not be in future court." A supplement filed at docket #8372, consulted a representative in 2002. Reference to 2002 proceeding must be to a prior class action in Mississippi. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not resolved in a prior proceeding and was not part of a still-pending proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel in all pending cases received direct notice of the bar date.

3544	TRO892993FTC	2/23/2016	Howell, Eddie	Eddie Howell	6963	8456	X	X		X		Says 2010 first diagnosis but also says previously filed with atty Harold Barkley as part of 1998 Kerr-McGee Class Action. Standard cut-and-pasted form language as to reasons why missed the bar date. Trust listed claim number as TRO902465, but a duplicate motion with that claim number is filed at docket #8456. Appears to be the same claimant at the same address. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 and not already resolved in prior action also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

3547	TRO896046FTC	4/6/2016	Gordon, Shelbie	Shelbie Gordon	6966			X		X		2009 diagnosis; did not know and no reason to know exposed to a Tronox product; says publication notice not reasonably calculated to provide notice; did not have knowledge of the ongoing case; did not receive direct notice nor notice through media; says symptoms and diagnosis 2009 after bar date. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. The motion for Anderson Tate [TRO898721FTC] is at docket #5735. The excuse for Alexander Tate III is that he was away from college during the 2009 claims period. A supplement filed at docket #8245, says unaware of the bar date, was away at school from 2006-2010 and unaware could file a claim. No explanation for lengthy delay between bar date and actual clam filing date. Says exposure began 7/8/88 so was at least 21 years old as of the bar date. Twanda Thomas claims a 2000 diagnosis. There is a medical record attached that references a surgery during the month of the bar date; says she was sole caregiver for parent who was diagnosed with serious illness and she was traveling out of state to assist with her charges and treatments and was focusing on that care therefore was not aware of deadline; not aware of articles in Wall Street Journal or any other publication; says violation of due process. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Illness and surgery in August 2009 may explain why claim not filed then but no explanation for many years' delay after the bar date before a claim was filed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Allowance of claims was done by the Trust, Court cannot comment on allegations of errors in prior claim allowances. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

3704	TRO901083FTC	8/16/2016	Lewis, Dicy	Sharon Lewis	7139	8212 9482	X	X		X		Various diagnoses, many before 2003, one in 2006, pneumonia in 2016; the injured party died in 2019; previously filed with Colom law firm 1999-2002 and with Lundy & Davis; says the amount of settlement was different when she signed, thinks she was coerced into signing and was not told that the litigation was an ongoing future tort claims. Seems to be under the impression that the bankruptcy process is a later part of the earlier class action, which is not correct. Claimant apparently received approximately \$17,431 net from the class action settlement. A supplement filed at docket #8212, claims that attorneys did not inform her of bar date, but the prior class action was over before the Tronox bankruptcy filing and there is no evidence claimant was still represented by counsel. In any event, class action counsel received direct notice of the bar date, and if they still represented the claimant but failed to file a claim that unexcused failure by counsel is not grounds for relief based on excusable neglect. A supplement filed at docket #9376 adding information and address for mailing. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 and not resolved in prior action also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Any claim as to a condition first diagnosed after the bar date (and any defenses as to the effect of the prior class action settlement) is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

3714	TRO884191FTC	11/25/2015	Hill, Landrick	Landrick Hill	7151			X		X		Says was unaware of claim filing date. It is difficult to read the medical records but it appears that certain diagnoses were prior to the bar date because claimant says that had he known of deadline, he would have put down "other medical records with the dates pertaining to your deadline dates and after the deadline dates." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. It appears that movant received approximately \$17,431 net from a class action settlement. A supplement filed at docket #8212. A supplement filed at docket #9376 adding information and address for mailing. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Claim either was resolved in a prior proceeding or, if not, was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

A supplemental letter filed at docket #8196, unaware of bar date, lawyer failed to file for future tort claim; was previously unfairly compensated. Appears to be under the impression that the bankruptcy process is connected to a prior class action and/or that counsel in a prior class action represented claimant in regards to the bankruptcy case. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. 3767	TRO898216FTC	6/20/2016	Gardner, Angela	Angela Gardner	7210	7211		X				2006 and 2008 diagnoses; claimant says unable to file proof of claim because incapacitated due to chemotherapy treatment that commenced on 10/29/2008 and continued throughout 2009, it resulted in increasing side effects and illness; was not mentally or physically fit at time bar date was announced to respond and make a claim; not aware of the announcement. Does not explain many years' delay after the bar date before a claim was filed. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and not other factors, including long delay after bar date before filing any claim, lack of evidence of diligence in pursuit of claim, and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. The Trustee's summary incorrectly referred to this party as having filed the motion at docket #4136 but that appears to be for a different Willie Holmes. As to the motion at docket # 7219: place of exposure not clear; alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 3776	TRO884095FTC	11/13/2015	Shelton, James	James Shelton	7221			X		X		The motion at docket #7221 is for James Shelton [TRO884095FTC]; the Trustee's chart incorrectly listed this claimant as having made the motion at docket #4010 but that was for a different individual, James Lee Shelton [TRO885186FTC]. James Shelton alleges in the motion at docket #7221 that his son received a 2015 diagnosis; also says he previously filed with the Colom law firm in the 2002 class action, outcome undisclosed; unclear if this claim is filed on behalf of James Shelton as the injured party or if it seeks compensation for his child. Says unaware of claims process; did not have knowledge of an ongoing Tronox case; did not receive a phone call, letter, not learn anything from TV or radio concerning this matter. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on the parent's conditions that were diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. To the extent the claimant wishes to pursue a claim based on a condition first diagnosed after the bar date (whether for himself or on behalf of his child), the merits of that claim should be resolved by the Tort Claims Trust under its dispute resolution procedures.

No motion for relief based on excusable neglect or due process. Disagreement over Trust's review of any post-bar date claim is to be resolved in the Tort Claims Trust dispute resolution procedure.
3781	TRO890383FTC	2/23/2016	Bigbee, Barbara	Barbara Bigbee	7226			X		X		Alleges a December 2012 diagnosis; was not aware of Tronox at that time. No pre-bar date diagnosis identified for which relief is sought, no grounds for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

3782	TRO884977FTC	Unknown	Sandeers, Lonzie	Gloria Conner	7227		X	X				Not included in Trust's summary. 1992 diagnosis; the injured party died in 1993; rep does not provide excuse. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3783	TRO902675FTC	8/16/2016	Barr, Timothy	Timothy Barr	7228		X	X				1986-89 diagnoses; may have previously filed with the Colom law firm because motion attaches a letter from firm to meet with them in 2002; did not know that he had a claim "or was able to file a claim because of settlement offered in 2002." If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Also filed a signed Rejection Notice alleging post-bar date diagnoses and exposures, but details are not clear. 3785	TRO895866FTC	3/24/2016	Tellis, Leroy	Linda Latham	7230	7231	X	X				The injured party died in 2006; rep says injured party was not living in a certain area therefore thought that he did not qualify; did not know that he qualified; did not know or had reason to know exposed to a Tronox product. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and not other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Movant's mistake as to whether people qualified who did not live in the area suggests actual knowledge of the claims process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3786	TRO902676FTC	8/16/2016	Barr, Curtis	Curtis Barr	7232		X	X				1987-89 diagnoses; it appears he previously filed with the Colom firm because he includes a letter from it in 2002 setting an appointment; did not know about bar date; the most recent he know about the case was in 2002 (that is the class action, not the bankruptcy) and he believed that to be the final filing. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

A supplement filed at docket #8140. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

3788	TRO881008FTC	12/4/2015	Dale, Angela	Angela Dale	7234		X	X				1983 diagnosis; unaware of bar date; no reason to know exposed to a Tronox product; says publication notice was not reasonably calculated to provide notice to claimants; does not read the Wall Street Journal. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3789	TRO886959FTC	12/7/2015	Dale, Michael, Jr.	Michael Dale, Jr.	7235						X	1994 diagnosis; unaware of bar date; says no reason to know exposed to a Tronox product; was young at the time. Will permit supplemental submission to verify age as of the bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
3790	TRO881009FTC	12/4/2015	Dale, Michael, Sr.	Michael Dale, Sr.	7236			X				1982 diagnosis; unaware of filing deadline; never received a letter from Kerr-McGee; does not read Wall Street Journal. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3791	TRO895124FTC	3/23/2016	Lee, Jeanette	Bobby Williams	7237		X	X				1980 diagnosis; rep says previously filed with atty Bambach in 2003, called but he could not find her application; later the movant was incarcerated. Filing in 2003 must have been in connection with a different matter, as the bankruptcy case was not filed until 2009. No indication the claim was ever part of a pending legal proceeding. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

3792	Unknown	12/4/2015	Lowe, Patricia	Andrea Stanley	7238	8363		X				1997 diagnosis; notice was not provided directly to claimant who allegedly was known to have a claim, but no supporting information explaining how or why Tronox allegedly knew of the claim; says publication notice was not reasonably calculated to provide notice but provides no explanation or details; says did not know or have reason to know she was exposed to a Tronox product. A supplement filed at docket # 8363, claimant did not subscribe to the Wall Street Journal. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Says movant lived in Maryville, IL in 2009, but notice of the bar date also was published in the St. Louis Post-Dispatch in June 2009, and St. Louis is only about 18 miles from Maryville. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3793	TRO894515FTC	3/23/2016	Cooke, Ron	Courtney Smith	7239		X	X				1980 diagnosis; did not receive any notice regarding the Tronox trust tort settlement; unaware could file a claim. 3794	TRO901464FTC	Unknown	Spraggins, Mandy	Francis M Bailey-Jones	7240	7241	X	X				Not included in Trust's summary. 1972 diagnosis; the injured party was a resident of Columbus, MS who died in 2001; rep moved away from Columbus and was unaware could file a claim. Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted. However, this claim was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing occurred.

3795	TRO888108FTC	12/18/2015	Davis, Curtis	Courtney Smith	7242	7243	X	X				Condition since 1966; in response to question about dates of diagnoses answered "yes" instead of providing specific dates; says was unaware of the deadline. Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted. However, based on the information in the motion and the age of the condition the claim appears to have been time-barred before the Tronox bankruptcy filing. Furthermore, the memo only addresses lack of knowledge and does not address other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3796	TRO902677FTC	8/16/2016	Barr, Hazel	Hazel Barr	7244		X	X		X		Alleges a 2009 diagnosis but also includes a 2002 letter from Colom firm scheduling an appointment; says was unaware of deadline; thought case was closed in 2002 (referring apparently to prior class action). Also attaches a signed Rejection Notice as to post-bar date diagnoses. Prior dealings with attorney show awareness of claim and legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted. However, this claim was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing occurred.
3799	TRO894717FTC	3/23/2016	Anderson, Julia	Julia Anderson	7248			X				Various conditions alleged, separate diagnosis dates for each are unclear but apparently all are pre-bar date, listed as being in period from July 1998 to March 15, 2007; place of exposure not clear; unaware of Tronox claims being filed in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3800	TRO892288FTC	2/23/2016	Gillespie, Joe	Bessie Gillespie	7249			X				May 2009 diagnosis; the injured party died in 2010; rep says injured party worked as a heavy equipment operator at Tronox/Kerr-McGee from 2004-2007, he was diagnosed in May 2009 with lung disease; family was knocked off their feet with what they had to go through and were focusing on getting him well, they did not get any notification. This was all around the time of the bar date. Explains delay in 2009 but does not explain lengthy post-bar date delay before filing claim or pursuing rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

3803	TRO886605FTC	12/7/2015	Brown, Ella	Ella Brown	7252			X				July 2009 cancer diagnosis; she was incapacitated around bar date and then undergoing treatments including radiation; filed with the Colom law firm in 2002, unclear of the results from that filing. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Dealings with Colom firm show knowledge of legal rights and potential claims. Cancer treatments explain 2009 failure to file by bar date but no explanation as to lengthy post-bar date delays in pursuing rights, admits no claim was filed until October 2015. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3804	TRO899922FTC	7/25/2016	Seely, Adam	Lizzie Walker	7253		X	X				Various diagnoses, all 1999 and earlier; the injured party died in 2004; rep says did not know and had no reason to know injured party had been exposed to a Tronox product; after high school, she moved to a rural area in Columbus with no electricity, running water, telephone service or cable television available. The first time she learned that Tronox was the Moss Tie Co. was in 2014. The Trustee's summary chart refers to this motion as relating to claim # TRO899922FTC but the paper copy shows claim number TRO896922FTC. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Unclear if contends that Colom firm represented claimant in 2009 but that would not be grounds for relief because the Colom firm received direct notice of the bar date, and failures by counsel are not grounds for relief based on excusable neglect unless counsel's failures can be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Statute of limitations did not run as to the claim for a minor. However, the parent merely alleges lack of actual knowledge and makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge of the bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. No excuse offered as to failure to file in 2009. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3849	TRO912089FTC	5/30/2017	Brandon, Christopher	Christopher Brandon	7305	8202	X	X				1990s diagnoses; previously filed with atty Howard Gunn in 2002; says had no knowledge of the bankruptcy proceedings, the only information given by the attorney when he called was "No News" "Still in Litigation." A supplemental "group" letter filed at docket #8202 on behalf of 5 claimants complaining about the process, complains that they thought they were represented by class action counsel. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Unexcused failures of counsel are not grounds for relief based on excusable neglect.

Says did not receive any additional correspondence. Prior class action was terminated before Tronox bankruptcy filing. In addition, notice of the bar date was sent directly to attorney who has been class action counsel, so if any class claims were unresolved the class attorneys had notice of the bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim either was resolved in prior class action or, if not, should have been filed by bar date, no grounds for relief from the bar date have been shown.

3856	TRO898212FTC	6/20/2016	Young, Anthony	Courtney "Corky" Smith, Esq.	7312	7313		X		X		Says did not receive any notice regarding the Tronox tort claims trust settlement; was not aware could file a claim. Says symptoms and diagnosis were in 2009. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and does not address other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Attaches a signed rejection notice as to post-bar date diagnoses but none are identified in the motion. Separate legal memo argues that claimant is entitled to relief based on excusable neglect and due process, but claim based on 1998 diagnosis was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 3859	TRO893227FTC	2/23/2016	Elam, Mary	Mary Elam	7318			X		X		Diagnoses in 1981 and 2012; previously filed with the Colom law firm in 1999; received \$500 award; says bankruptcy discharge of claim was a violation of due process, without explanation; says the manifestation date she put on her first application to Garretson listed hypertension as a pre-petition condition but that hypertension related to a pregnancy and was resolved shortly after pregnancy, she is now amending her manifestation date to 2012 for hypertension as she was diagnosed for it after bar date and she maintains it was caused by exposure to creosote. Also alters many of the diagnosis dates from her original application with Garretson. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Movant does not explain failure to file by bar date for claims based on pre-bar date diagnoses, claim based on 1981 diagnosis also was time-barred before the Tronox bankruptcy filing. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. 3861	TRO889414FTC	2/23/2016	Williams, Lucile	Gwendolyn Williams	7320	8202	X	X				Mid-1960s diagnosis; the injured party died prior to 2009; previously filed with atty Howard Gunn in 2002, outcome unspecified; rep says she did not have knowledge of the claims filing deadline, no written notice was received. A supplemental "group" letter filed at docket #8202 on behalf of 5 claimants complaining about the process, complains that they thought they were represented by class action counsel. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was fully resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Unexcused failures of counsel are not grounds for relief based on excusable neglect.
3862	TRO889912FTC	2/23/2016	Carter, Wanda	Wanda Carter	7321	7708		X				2008 diagnosis; says incapacitated, chronic weakness and blood loss; did not know exposed to a Tronox product; had not seen anything on TV or local paper, first learned of it in neighborhood meeting, soil sample done. A duplicate of this claim is filed at docket #7708. Does not explain long period after the bar date before filing a claim without any other apparent action to pursue claim or legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3863	TRO889244FTC	2/23/2016	Hughes, Vera	Vera Hughes	7322			X				1960 diagnosis; was not aware of time line; place of exposure not clear. Notice of the bar date was published in the St. Louis Post-Dispatch in June 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3864	TRO880211FTC	12/4/2015	Joiner, Brenda	Brenda Joiner	7323		X	X				2005 and earlier diagnoses; former resident of Columbus, MS; previously filed with Landis Sexton law firm some time prior to 2009; supplied law firm with medical records; the next time she received any information was in 2013. Affidavit of service shows notice of the bar date was mailed directly to Landis Sexton on behalf of other clients, so if counsel was retained by Ms. Joiner before the bar date counsel was aware of the bar date itself. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3866	TRO903458FTC	11/23/2016	Smith, Yvonne	Yvonne Smith	7325			X				2001-2002 diagnoses; did not know about it. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3867	TRO898652FTC	6/27/2016	Stevenson, Delma	Delma Stevenson	7326			X		X		Unaware of the claim process and failed to file a claim; says symptoms 1999 and diagnosis Sept 21, 2009. No pre-bar date diagnosis identified for which relief is sought, no grounds for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3868	TRO886231FTC	12/7/2015	Baker, John	John Baker	7328		X	X				Various diagnoses, all 2002 and earlier; previously filed with the Colom law firm, outcome not disclosed; says did not file in 2009 due to his illness; unaware exposed to harmful chemicals. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim either was resolved in prior proceeding with the Colom firm or, if not, was time-barred before the Tronox bankruptcy filing.
3869	TRO893313FTC	2/23/2016	Williams, Pandora	Pandora Williams	7329		x	X				Began having asthma in 1992; diagnosis date listed as "N/A;" says was unaware of bar date; she was not privileged nor did she know to get the Wall Street Journal publication or any of the other articles. Says public was not advised until 2011, but does not explain basis for that contention. Also fails to explain long delay before filing a claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

3874	TRO886493FTC	12/7/2015	Jones, Mildred	Mildred Jones	7334			X		X		Says diagnoses began in 2010; lived in Columbus, MS as a child and lived there with mother in 2009-2011; says previously filed a claim with Edwin A. Flint, Jr. in 2002 but did not receive any follow-up; says was in the military (dates not specified) and did a lot of moving. Claim filed in 2002 must have been in connection with a prior lawsuit as the bankruptcy case was not filed until 2009. Motion does not identify any claim based on a pre-bar date diagnoses for which relief from the bar date is sought. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

In addition, supplemental letters were filed by Billy Wayne Bridges for this group at docket ## 8019, 8068 (with a duplicate at 8391), and 8528 (with a duplicate at 8530) and #9408, and #9432, complaining about the process. Basically, it is a motion for reinclusion in the original Tronox tort claim Class D, which only covered people who actually filed timely proofs of claim before the bar date. Claimants say they were represented by the Creosote Litigation Group of Mississippi since 2002 (Bambach); firm lost records; turned over to Tollison firm after 2009. They appear to confuse the bankruptcy case with the prior class actions and appear to think (without confirmation) that the prior class action counsel was representing them in the 2009 bankruptcy case. Funds for Tort Group D have already been distributed, inclusion in that group is not possible and that request is moot. In addition, attorneys in the Creosote Litigation Group had direct notice of the bar date, so if they actually represented this group then proofs of claim should have been filed. Unexcused failures of counsel are not grounds for relief based on excusable neglect. Motion is denied.

3882	TRO902805FTC	8/16/2016	Holiness, Arabella	Courtney "Corky" Smith, Esq.	7342	7343		X		X		2012 diagnosis; the injured party is deceased; she was elderly and having serious health issues in 2009. She did not receive any notice of the Tronox Tort Trust Claims Settlement and her family members were not aware she could file a claim. Separate legal memo argues for relief based on excusable neglect or due process, but the motion has not identified any pre-bar date diagnosis for which relief is sought. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3883	TRO894513FTC	3/23/2016	Williams, Ofie	Courtney "Corky" Smith, Esq.	7344	7345	X	X		X		1998 diagnosis; the injured party died in 2000. Also filed a signed rejection notice as to post-bar date exposures and diagnoses, but none are identified in the motion. Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted. However, the claim based on the 1998 diagnosis was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing occurred. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3884	TRO893306FTC	2/23/2016	Lawrence, Brenda	Courtney "Corky" Smith, Esq.	7346	7347		X		X		February 2008 diagnosis; says did not know about it; did not receive notice of the Tronox tort claims trust settlement; was not aware she could file a claim. Also attached a signed Rejection Notice as to post-bar date exposures and diagnoses, but none are identified in the motion. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and does not address other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

She says she was also having personal and medical issues around 2009, constantly seeing multiple doctors but there aren't any medical records provided for time near bar date; says by the time she knew about the new claims filing it was too late. Does not explain lengthy post-bar date delay in filing claim and in apparently taking no other action to pursue legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 3894	TRO885400FTC	11/25/2015	Martin, Mary	Mary Martin	7362			X		X		2008 and 2009 diagnoses; unaware that she could file a claim. Also submitted a rejection notice alleging post-bar date exposures or diagnoses. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
3895	TRO898857FTC	6/27/2016	Richardson, Jada	Jamila Williams	7363			X				December 2005 diagnosis; former resident of Columbus, MS; rep filing for a minor; says filed a claim in November 2016 and it was denied. Does not explain representative's failure to file a claim before the bar date. No grounds stated for relief.
3896	TRO885465FTC	11/25/2015	Webb, Kimberly	Kimberly Webb	7364			X				Diagnosed in childhood (late 1980s or early 1990s); previously filed with atty Gunn in 2002; says she already sent her medical records to William Howard Gunn and others in the group. Seems to think the bankruptcy process is a continuation of prior class action, which is not the case. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Apparently was 20 years old as of the bar date but does not explain why movant and movant's representative did not file a claim, does not explain long delay after the bar date before filing a claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3897	TRO896923FTC	4/25/2016	DiGregorio, Mark	Mark DiGregorio	7365			X				1979 diagnosis; was not aware of any claims nor did he realize that there was a legal proceeding against Kerr McGee during that particular time period otherwise he would have filed a claim. Also, indicates that he did not know and had no reason to know that he had been exposed to a Tronox product. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Also, indicates did not know and had no reason to know exposed to a Tronox product. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3899	TRO885481FTC	11/25/2015	Webb, Ella	Ella Webb	7367		X	X				1950s diagnosis; previously filed with the Creosote Litigation Group, which included W. Howard Gunn, William Bambach and William Cunningham; says she thought she really had filed prior to bar date through these lawyers and has been sending information to them since 2002 and they changed with many different lawyers at times. Filing with class action attorneys was in connection with a separate proceeding, was not part of the bankruptcy case. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Unclear if Creosote Litigation Group represented this movant in 2009 but if so they should have filed a claim, because the attorneys with the Creosote Litigation Group received direct notice of the bar date. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Claim either was resolved in an earlier proceeding; or, if subject to a pending proceeding, should have been the subject of a proof of claim; or, if neither of those was the case, the claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
3900	TRO884976FTC	11/25/2015	Colvin, Sr. Bobby	Bobby Colvin, Sr.	7368		X	X				1970s diagnosis; previously filed with Colom law firm 2002, outcome not disclosed; says did not file a claim in Tronox bankruptcy prior to bar date because he was unaware of an ongoing case. Also, complains that there are those in the neighborhood who have been rewarded for injuries such as nose bleeds, while he is suffering with many medical conditions and has not been compensated. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claims and legal rights. No evidence the claim was subject to a pending proceeding at the time of the bar date. Claim either was resolved in a prior class action or, if not, was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Publication notice was reasonable and consistent with due process. Claimant also has not shown diligence in pursuing legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
3924	TRO880120FTC	12/4/2015	Gandy, Naomi	Courtney "Corky" Smith, Esq.	7400	7402		X		X		2006 diagnosis; did not receive any notice regarding the Tronox tort claims trust settlement; was not aware a claim could be filed. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and does not address other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

The court approved notices in 2009 that included publication in local newspapers where plants were located and also in national edition of Wall Street Journal. Publication notice was reasonable and consistent with due process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

3997	TRO898977FTC	6/27/2016	Brewer, Anthony	Anthony Brewer	7483	7484		X		X		2007 diagnosis; unaware he was drinking from contaminated water; says did not experience any of the conditions until he moved there. Also submits a signed rejection notice as to post-bar date exposures and diagnoses, though none are identified in the motion. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and does not address other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

4012	TRO889542FTC	2/23/2016	Stewart, Denetra	Denetra Stewart	7512		X	X				Diagnosis listed as "10," apparently meaning age (so approximately 1990); former resident of Columbus, MS; was not informed of bar date in ample time; works 2 jobs when gets out of work post office closed; did not have family there to help her to handle business. Her computer is monitored closely, limited time off. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
4013	TRO889144FTC	2/23/2016	Demo, Dylan	Dylan Demo	7513	8089					X	Minor (11 at time of bar date); no knowledge of Tronox bankruptcy; says her mother no longer resided in MS at that time also had no knowledge; did not see any television or newspaper ads or any article relating to Tronox bankruptcy or deadline; symptoms and diagnosis 2009. A supplement filed at docket #8089, says was only 11 when started having asthma symptoms. Merely alleges lack of knowledge on parents' part but will permit supplemental submission as to why parents or guardians did not file in 2009, why claim was not filed until so many years after the bar date, and whether relief is warranted.
4014	TRO913992FTC	6/28/2017	Daniel, Early	James Daniels	7514	7710	X	X				Diagnoses 1955, 1962, 1970, 1973; the injured party is a former resident of Birmingham, Alabama who died in 1973; rep says the bar date form of notice was insufficient on its face but does not say how; says publication notice was not reasonably calculated to provide notice; prior to bar date, claimant did not know and had no reasonable knowledge that he had been exposed to a Tronox product. A duplicate motion with supplemental material filed at docket # 7710. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. If claim is based on exposures in Mississippi or Alabama then the claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

4016	TRO893061FTC	2/23/2016	Hargrove, Edward	Telisa Young	7516	8281	X	X				Motion lists various diagnoses, all 2003 and earlier; the injured party died in 2003. A supplement filed at docket # 8281. Representative says the time between publication of notice in June 2009 and bar date 8/12/20019 was insufficient, not reasonably calculated for a claimant to pursue a potential claim; that might have explained a few weeks’ lateness but it does not explain the many years’ post-bar date delay before a claim was filed. Says did not have access to any of the publications and that notice was not in the local paper, the Commercial Dispatch, but in fact the bar date notice was published in The Commercial Dispatch on June 23, 2009. Says was not aware and had no reason to know that the injured party had been exposed to Tronox product although Tronox was aware of nature of chemical; violation of due process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 4017	TRO892923FTC	2/23/2016	Young, Telisa	Telisa Young	7517			X		X		Says symptoms and diagnosis post-bar date, though includes some medical records for earlier dates; says violation of due process; publication notice period short, not reasonably calculated to provide notice; unaware exposed to a Tronox product. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Representative says the time between publication of notice in June 2009 and bar date 8/12/20019 was insufficient, not reasonably calculated for a claimant to pursue a potential claim; that might have explained a few weeks' lateness but it does not explain the many years' post-bar date delay before a claim was filed. 4019	TRO898160FTC	6/20/2016	Davis, Christina	Christina Davis	7519		X	X		X		Various diagnoses, some before bar date, some after; previously filed with the Colom law firm, received \$500 reward; unaware of the bankruptcy proceeding as was in and out of the hospital during those years, does not specify dates; was unaware exposed to harmful toxins, though also alleges was part of a lawsuit that included such allegations. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. If claims based on conditions diagnosed before 2006 were not resolved in a prior proceeding then they were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 4028	TRO898738FTC	6/27/2016	Smith, Tara	Tara Smith	7528		X	X		X		Former resident of Columbus, MS who still lived there in 2009. Standard cut-and-pasted form language as to reasons why missed the bar date. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Does not explain many years' delay after the bar date before filed a claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Publications complied with due process as explained in the accompanying decision. In addition, attorney Bambach received direct notice of the bar date by mail. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Publication notices were reasonable and complied with due process for the reasons stated in the accompanying Decision. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Standard cut-and-pasted form language as to reasons why missed the bar date. Even if health of decedent near time of bar date would explain failure to file in August 2009 there is no explanation of lengthy post-bar date delay before filing claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Says that the severity of her condition was not known until after the bar date, and it caused her to do further research. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. The rumors and conversation that was voiced sounded more like false gossip rather than something valuable and important to their health and life in general. Requests that their ignorance be excused. Notices were approved by the court with the knowledge and involvement of counsel active in creosote litigation (including in Mississippi) and were consistent with due process and have previously been approved in other decisions. Roderick	Frances Oden	7555		X	X				Diagnoses 1978, 1984, 2003, 2004; the injured party died in 2007; former resident of Columbus, MS; alleges that a claim was filed with atty Landis Sexton 2003, who represented all of the Maranatha Center claimants and he was supposed to have filed a claim but did not do so (however, the bankruptcy filing did not occur until 2009, so any contemplated claim in 2003 had to be in connection with a different proceeding); it was their understanding that the case was on hold pending the bankruptcy and they would get written notification when the litigation would proceed, but the bankruptcy was six years later, in 2009. Reference to the bankruptcy case suggests knowledge of the proceeding. No indication that claimant was actually a plaintiff in another proceeding, but bar date notices were mailed to all persons in pending cases or, if their addresses were not known, to their attorneys of record. Not clear if attorney Sexton was the movant's counsel when the Tronox bankruptcy case was filed but, if so, a proof of claim should have been filed, as attorney Sexton received direct notice of the bar date by mail, and an alleged unexcused failure by counsel is not grounds for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
4135	TRO893635FTC	2/23/2016	Scott, Leroy	Leroy Scott	7636		X	X		X		Says first diagnosed in 2010 but also says previously filed with the Colom law firm in 2002 Kerr-McGee Class Action, does not disclose outcome. Standard cut-and-pasted form language as to reasons why missed the bar date. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. If claims based on conditions diagnosed before 2006 were not resolved in a prior proceeding then they were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date (including any defense based on the terms of resolution of the prior class action) are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

4136	TRO891822FTC	2/23/2016	Hibbler, Jr., Vondurell	Vondurell Hibbler, Jr	7637		X	X		X		Diagnoses 1993 and 2017; says that previously filed with Colom law firm, Cochran, Hunter Lundy & Davis, Richmond Simon & Agston, Hamilton Sexton & Berry 2001, does not disclose outcome; says did not receive direct written notice of bar date although had commenced a legal proceeding against Tronox, but the referenced proceeding was outstanding at the time of the bankruptcy filing, and in any event the counsel identified received direct notice of the bar date. Says he was told by atty that paperwork was lost but that may refer to the previously closed action. Also asserts due process claim because publication notice not reasonably calculated to provide notice; says did not see publication notice and was not aware of the bar date or of the bankruptcy case and therefore says did not receive sufficient notice to file a timely claim. If pre-bar date claim was resolved in a prior action it could not be asserted in the Tronox bankruptcy. If it was not part of a pending action, it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In those instances, publication notice would have been appropriate because Tronox would have had no reason to know that the claimant had an unresolved claim. If the claim was the subject of a still-pending litigation, then a proof of claim should have been filed, as notice by mail was provided to all plaintiffs in pending litigations (or to their counsel if the plaintiffs' addresses were not known), and the proof of service on file shows that the listed attorneys received notice of the bar date. Notice sent to counsel is imputed to the client. Failure by counsel to file a claim is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Trustee challenges the timeliness of the motion but movant has not identified any claim based on a pre-bar date diagnosis for which relief is sought and only seeks to pursue post-bar date claims, deadline therefore is not relevant. No pre-bar date diagnosis identified for which relief is sought, no grounds for relief based on excusable neglect or due process. Trustee contends the motion was untimely but it will be accepted based on the postmark date. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Trustee contends the motion was untimely but it will be accepted based on the postmark date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

4253	TRO889883FTC	2/23/2016	Hargrove, Tyshun	Tyshun Hargrove	7759			X		X		Alleges September 2009 symptoms and December 2009 diagnosis; says bar date notice allowed too little time, but that would not have explained lengthy post-bar date delay before this claim was filed; says violation of due process to expunge claim; did not know and no reason to know exposed to a Tronox product. Does not allege a claim based on a pre-bar date diagnosis, no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures. Trustee contends the motion was not filed within 90 days after Determination Notice, but that deadline is relevant only to the request for relief from the bar date as to pre-bar date claims, movant has only identified post-bar date claims to be pursued.

Trustee contends the motion was untimely but it will be accepted based on the postmark date. Prior dealings with attorney show awareness of claim and legal rights. Unclear if filing with attorneys led to a pending litigation at the time of the bankruptcy but if so direct notice of the bar date was provided to counsel and a proof of claim should have been filed. If claim was not pursued by counsel, that is not grounds for excusable neglect unless counsel's failures are excusable, no such excuse has been offered. Furthermore, if the claims were not part of a pre-bankruptcy litigation then they were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
4255	TRO898362FTC	6/20/2016	McCrary, Tijah	Tammie Shennod	7761	7762	X	X				Diagnosis before 2002; alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant. Duplicate motion is at docket # 7762; the docket entry incorrectly refers to Danica Jones, whose motion is at docket # 7764. Trust contends motion was untimely but the motion will be accepted based on the postmark date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Court sympathizes with difficulties but they do not amount to an incapacity in the sense of an inability to file a claim or to enlist the help of others in doing so. Does not allege lack of knowledge of bar date, does not explain long post-bar date delays before filing a claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Trustee contends the motion was untimely but it will be accepted based on the postmark date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims that people in place to answer questions (unclear to whom referring) deliberately told individuals that they were only affected if they lived near the plant and as she did not reside within the noted radius, she thought she could not have been exposed to the product; this likely was a communication in relation to a prior class action that was on behalf of residents who lived within a certain distance of the plant. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Conditions were identified in 1965, 1968, 1974; exposure occurred as a child before relocated to another state, does not say where exposure occurred; did not have any reason to understand or knowledge that diseases were caused by exposure to Tronox product; notice not reasonably calculated to reach all claimants, in particular claimants who no longer reside in area would not be notified by local publication; as out of state claimant, notice was insufficient. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Complains of publication notice not covering claimant's area but notice of the bar date was published in The Birmingham News on June 24, 2009. To the extent claimant is making a claim on her own behalf it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 4347	Unknown	2/23/2016	Robinson, Ida	Ida Robinson	7862		X	X				Diagnoses 2004 and 2005; previously retained Colom law firm and was paid \$550; says has not been fairly compensated; unaware that attorney would not file a claim on claimant's behalf. Trustee contends the motion was untimely but it will be accepted based on the postmark date. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. In addition, no indication the Colom firm continued to represent movant in 2009, but that would not be helpful because the Colom firm received direct notice of the bar date. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Trustee contends the motion was not filed within 90 days after Determination Notice, but that deadline is relevant only to the request for relief from the bar date as to pre-bar date claims, movant has only identified post-bar date claims to be pursued.
4349	Unknown	2/23/2016	Henley, Terry	Terry Henley	7864		X	X				Diagnoses 2000 and 2005; unaware condition was related to Tronox chemicals. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Provided attachment with all medical records, with a few exceptions, most are after bar date, but not entirely clear when each condition was first diagnosed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Diagnoses 1981-1984; the injured party died in 1984; says previously filed with Colom law firm, paperwork lost. Class action was a different case, not part of the bankruptcy. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

4468	TRO891180FTC	Unknown	Douglas, Lonnie	Lonnie Douglas	7988			X		X		Not included in Trust's summary. Diagnoses March 2009 and January 2014; says previously filed a claim with local church group Maranatha and did not hear anything, when she inquired was told her name was not included in their record; filed with atty Bambach who is deceased. If someone else failed to file a 2009 claim that does not constitute excusable neglect unless that other person's conduct is excused and explained. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. 4469	TRO894654FTC	Unknown	Williams, Brenda	Brenda Williams	7989			X				Not included in Trust's summary. 2007 diagnosis; unaware could file a claim; after atty Bambach deceased was informed too late. Attorney Bambach did not die until 2013, that is no reason why 2009 bar date was missed. Unclear when retained Bambach but if before bar date that is no excuse because Bambach received notice of the bar date and unexcused failures of counsel are not grounds for excusable neglect. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Date of filing with attorney is not specified but Atty Bambach died in 2013. If was retained before bar date that is not grounds for relief based on excusable neglect because Bambach received notice of the bar date and unexcused failures of counsel are not grounds for relief. In addition, claims based on 1997 and 2005 diagnoses were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Date of 2009 diagnosis not clear. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be decided by the Tort Claims Trust under its dispute resolution procedures.

4471	TRO892538FTC	Unknown	Harris, Fannie	Fannie Harris	7991			X				Not included in Trust's summary. January 2009 diagnosis; says previously filed with atty Bambach but he passed away, but his passing was in 2013, does not explain failure to file in 2009. Unexcused failure of counsel is not grounds for relief based on excusable neglect or due process. Says tried to refile and sign up with Maranatha church after death of Bambach but did not hear anything, then told it was over, but if that was after the passing of Atty Bambach it was already years after the bar date. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process.
4472	TRO898081FTC	Unknown	Martin, Melvin	Melvin Martin	7992			X				Not included in Trust's summary. March 2009 diagnosis; lawyer he signed up with is deceased (lawyer not named and date of passing not specified); informed another attorney would take over but did not hear anything. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process. If lawyers failed to follow up, their failures are not grounds for relief based on excusable neglect unless the lawyers' own failures are excusable.

Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
4474	TRO885399FTC	Unknown	Martin, Larry	Larry Martin	7994			X		X		Not included in Trust's summary. 2008 and 2009 diagnoses; says previously signed up with atty Bambach (deceased), but atty Bambach did not die until 2013, that is no reason why bar date was missed; unaware of last time they did claims or that could sign up. If the allegation is that Bambach was retained in 2009 that is not enough; unexcused failure of counsel is not grounds for relief based on excusable neglect or due process. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process and to pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

4573	TRO902382FTC	9/14/2016	McMullen, Lillie	Verda Carr-McCoy	8424		X	X				1979 diagnosis; the injured party is a former residence of Columbus, MS who is deceased; rep says that the form notice of bar date was deficient on its face; publication notice not reasonably calculated to provide notice; was not aware nor had reason to be aware that injured party was exposed to dangerous Tronox product; rep learned of lawsuit in 2016, then researched and filed claim. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 4576	Unknown	3/24/2016	Crowell, Antonio	L. Nichole Clinkscales, Esq.	8428		X	X				1995 diagnosis; previously filed claim with Colom law firm, was paid \$500, does not believe was fairly compensated. Says was unaware that "my attorney" would not file a claim on his behalf - unclear who attorney was at that time, but apparently is referring to the Colom firm. Claim resolved in a prior class action could not be reasserted in the Tronox bankruptcy case, and if some part of the claim was not resolved in the class action it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Unclear if Colom firm was counsel to claimant in 2009 but even if it was that would not be an excuse, because the Colom law firm received direct notice of the bar date. Allegation that Colom firm should have filed a claim is not grounds for relief, because unexcused failures by counsel are not grounds for relief based on excusable neglect.
